

Does Perfume Make You Sick?

Do pesticides or smoke make it hard
for you to breathe?

That sounds like...

Multiple Chemical Sensitivity (MCS)

Symptoms of MCS: headaches, chronic fatigue,
dizziness, depression, asthma, pain, & many others.

Causes of symptoms: fragrances, pesticide, carpet,
vehicle exhaust, chlorine, & many other chemicals.

*If you know someone with MCS, please ask them
how you can make their life easier.*

To learn more, or to join our support group, call
(248) 301-2283 or go to www.mcsfriends.org
